CHARACTERISTICS
Colourful | Distinctive | Decorative

COLLECTION

The Habitat collection of planters are both practical and decorative, allowing you to bring that touch of green elegance to your outdoor space.

The highly textured handcrafted woven bases, curated in distinct colourways, produce an interesting and beautiful combination for the eyes.

Designed with removable inserts, plants can be directly planted into the inserts (drainage holes optional) or potted.

The perfect accessory to any OHMM collection, especially when combined in a curated mix of sizes, colourways and different plant types.

As good indoors as outdoors.
