

HANDCRAFTED IN OUR OWN FACTORY IN THE PHILIPPINES

Best in class materials is only half the equation. We employ only the 'best of the best' craftsman in the industry. From framers to the world's best Cebuano weavers producing an exceptionally tight and tidy finish. No short cuts. We finish the outside and as well as the underneath of the item to perfection. All production is done in-house with a strict quality assurance programme.

From extruded 6000 series aluminium for strength and durability with a 1.65mm or 2.2mm gauge for powder coated finished items. Industry superior structural frames constructed with strongly welded joints to ensure maximum strength. All frames are fully electrostatically powder coated to avoid any oxidation and in a colour similar to that of the fibre.

DURABLE SUPERIOR FRAMES

POWDER COATED FRAMES | NON WOVEN

All non woven frames are fully electrostatically powder coated with INTERPON UV powder coatings. Highly scratch resistant and durable - will not fade or oxidise.

OHMM has teamed up with Rehau® - the most recognised and trusted name worldwide in polymer technology for over fifty years.

Raucord synthetic rattan fibre is manufactured using renowned German engineering know how and production technology from polyethylene. The fibre is stapled onto the frames using stainless steel Grade 304 'U' shaped staples, expertly hidden by the weavers.

Due to its superior characteristics, Raucord fibre offers a carefree outdoor experience.

UV-resistant | Weatherproof | Temperature Resistant | Strong & Durable | Low Maintenance | Easy to Clean | Non-toxic | Environmentally Friendly | Colourfast | Scratch & Stain Resistant

GERMAN MADE WORLD'S BEST SYNTHETIC RATTAN

EXPERTLY DESIGNED CUSHIONS FOR COMFORT & DURABILITY

Working with artisanal sofa makers and foam manufacturers, OHMM cushions are expertly designed for support, comfort and durability using the latest material technology, and are manufactured in our own in-house facility.

WHAT ARE WE MADE OF? INFO SHEET

High density foam 40kg/m³ will last and not sag over time with high usage. Medium firmness and comfortable. Covered with high quality USA UV spunbond linings which are replaceable.

CUSHION FOAM PADS

WORLD'S BEST OUTDOOR FABRIC

Sunbrella® from USA - the most recognised and trusted name worldwide in outdoor fabrics for over fifty years - utilises only the finest raw materials, together with ISO 9000 certified vertical manufacturing operations and on site testing labs - all add up to unparalleled performance and good looks.

Colourfast | Fade Resistant | Durable | Water Repellent | UV-resistant | Stain Resistant | Mould Resistant | Luxurious Touch | Breathable | Environmentally Friendly | Easy Care

We stitch using high quality German Serafil polyester threads and use robust non rust nylon zippers and runners - so covers are removable for cleaning.

GERMAN MADE THREADS & ZIPPERS

OHMM DRYPRO+ CUSHIONS

If your cushions are exposed directly to rain, we recommend OHMM's revolutionary DRYPRO+ outdoor cushion technology - it allows you to leave them out all the time. It doesn't matter if they get wet; the foam cores will stay dry and the fabric covers dry out fast too.

We only use world class quality tempered glass. A type of safety glass that is much stronger than normal glass. When broken it will crumble into small granular pieces instead of jagged shards like normal glass. The granular pieces are less likely to cause injury.

TEMPERED GLASS

Clear glass 6mm thickness is set in 10mm from edge of the table for better looks and comfort. Frosted glass insert thicknesses conform to size of table for strength and safety - 8mm thickness on tables up to 180x100cm; 10mm thickness on tables larger than 180x100cm. All edges are chamfered and corners rounded.

ARTISANAL ITALIAN CERAMIC

High impact resistant industrial ceramic tops produced by Italian artisanal ceramic manufacturers in a small town south of Venice. This unique frost proof ceramic material is highly resistant to impact, abrasion and is also stain proof. Perfect for outdoor usage.

WHAT ARE WE MADE OF? INFO SHEET

Made from multiple layers of Kraft papers impregnated with phenolic resins, covered with melamine impregnated decor papers and all pressed together under high heat and temperature. Exterior grade, 12mm thickness. Extremely durable, impact resistant, moisture resistant, highly scratch resistant and anti-bacterial.

**HIGH PRESSURE
COMPACT
LAMINATE (HPCL)**

**MODULO FEET
CAST ALUMINIUM**

Cast aluminium finished with Berger marine grade gloss varnish for added protection. Will not rust or oxidise. Replaceable.

Made of stainless steel Grade 304, ferrules are used to protect the bottom of legs on some items. Also for aesthetic good looks. Occasional polish with a stainless steel cleaner e.g. 3M recommended.

FERRULES

GLIDERS

Made of high density nylon, gliders are important for ease of furniture movement and non scratching. Replaceable.

Specially designed glass anchors which hold glass tops firmly in place on fully woven table tops. Made of two components - a polyethylene base with 'legs' which lock into the fibre and a concave shaped silicone top which provides suction onto the glass. Replaceable.

**GLASS
ANCHORS**

**GLASS
SUPPORTS**

Support for frosted glass insert table tops. Made of two components - a stainless steel eccentrically shaped core which screws into the side of table and with rotation allows for minor height adjustment. Covered with UV rubber which is in contact with the glass and provides safe 'cushioning'.

Made of stainless steel Grade 304, our brand and quality badges are also silver plated. Will not rust or oxidise.
